GENESIS LANGUAGE GRAMMAR v0.1
MK147 + MK43 ULTRA LANGUAGE ARCHIVE

=====

STATUS

=====

This document does NOT define vocabulary.

This document defines how Genesis functions
as a spoken and written language.

Structure defines:

What Genesis believes.

Rules define:

How Genesis behaves.

Grammar defines:

How Genesis speaks.

Lexicon will later define:

What Genesis calls things.

=====

CORE GRAMMATICAL PHILOSOPHY

=====

English is object-first.

Genesis is relationship-first.

English asks:

What is the object?

Genesis asks:

What is the boundary?
What occupies it?
What relationship persists?
What identity closes?

English:

The mountain exists.

Genesis:

The mountain persists.

English:

The wagon is red.

Genesis:

The wagon expresses Red Basin identity.

English:

The storm is coming.

Genesis:

Basin instability propagates.

=====

1. WORD ORDER

=====

Default Genesis structure:

Topic
→
Relationship
→
Identity
→
Resolution

Equivalent architectural view:

Boundary
→
Relationship
→
Resolution

Closest English approximation:

Subject
→
Object
→
Verb

Genesis example:

Gen-vara va ve-ru

Literal:

Genesis-storm topic propagating

English:

The Genesis Storm is approaching.

Compression Rule:

Common speech often drops particles
when context is obvious.

Formal:

gen-vara va ve-ru

Compressed:

gen-vara ve-ru

2. PARTICLES

Particles define relationships.

They are more important than many nouns.

TOPIC

va / wa

Meaning:

As for...
Regarding...
Within this context...

Example:

ka-en va

As for this thing...

BOUNDARY

sha

Meaning:

Boundary
Inside
Place
Edge
Containment

Example:

Kira-sha

Within Kira's boundary.

IDENTITY

en

Meaning:

Identity
Thing
Self-state

RELATIONSHIP

rel

Meaning:

Connection
Adjacency
Relation

OCCUPANCY

da

Meaning:

Occupies
Resides in
Exists within

DIRECTION

ve

Meaning:

Toward
Propagating toward
Moving toward

INHERITANCE

ar

Meaning:

Inherits
Carries continuity

CAUSE

sera

Meaning:

Continuity source
Because of
Through continuity

COMPARISON

tal-rel

Meaning:

Relative stabilization
Compared relationship

QUESTION

ka?

Placed at sentence end.

=====

3. PRONOUNS

=====

Genesis pronouns are boundary-based.

SELF

ka

Within my boundary.

Equivalent:

I
Me
This

OTHER

sa

Within your boundary.

Equivalent:

You
That near you

DISTANT

a

Outside both boundaries.

Equivalent:

They
That over there

UNKNOWN

do

Unresolved identity.

Equivalent:

What
Which
Who

SHARED

kara

Shared boundary.

Equivalent:

We
Us

EXTERNAL COLLECTIVE

ara

External group.

Equivalent:

They

=====
4. NOUN BEHAVIOR
=====

Genesis nouns are identity roots.

Common noun forms:

IDENTITY FORM

-en

Thingness.

Example:

wagon-en

BOUNDARY FORM

-sha

Place / containment form.

Example:

wagon-sha

wagon interior
wagon space

PERSISTENCE FORM

-rin

Persistent object.

Example:

mountain-rin

TOPOLOGY FORM

-ael

Structural form.

Example:

bridge-ael

bridge structure

ABSTRACT FORM

-sera

Conceptual continuity.

Example:

identity-sera

concept of identity

5. VERB BEHAVIOR

Genesis verbs are process roots.

ar
inherit

ve
propagate

tal
stabilize

kor
collapse

tor

close

rin

persist

nor

normalize

rel

relate

da

occupy

Verb placement:

Usually sentence-final.

Example:

gen-vel va kor

=====

6. ASPECT / RESOLUTION STATES

=====

Genesis tracks resolution rather than time.

-ta

Completed.

Resolved.

Closed.

-ru

Ongoing.

Propagating.

-ma

Potential.

Unresolved.

-nai

Failed.

Absent.

Broken.

Examples:

kor-ta
collapsed

kor-ru
collapsing

kor-ma
may collapse

kor-nai
failed collapse

=====

7. ADJECTIVES / QUALITIES

=====

Genesis does not use English-style adjectives.

Qualities are expressions.

BASIN EXPRESSIONS

wagon nae-ra

wagon expressing Red Basin

INHERITED STATE

wall tal-rin

stabilized wall

PERSISTENT STATE

tree rin-deep

deeply persistent tree

RELATIONAL QUALITY

Nyx rel-rin Kira

Nyx persists in relation to Kira

=====

8. PLURALITY / GROUPS

=====

Genesis classifies groups by continuity.

SINGLE

en

identity

MULTIPLE

en-da

occupied identities

UNIFIED GROUP

en-rin

persistent collective identity

SWARM

en-ve

propagating identities

BROKEN GROUP

en-nai

failed collective identity

=====
9. TIME
=====

Genesis does not naturally think in:

Past
Present
Future

Genesis thinks in:

Unresolved

Resolving

Resolved

Persistent

Example:

English:

The storm came.

Genesis:

The storm resolved.

English:

The storm is coming.

Genesis:

The storm is propagating.

=====

10. QUESTIONS

=====

Question root:

do

Question suffix:

ka?

do-en va rin ka?

Which identity persists?

do-sha va kor ka?

Which boundary collapsed?

do-rel va ar ka?

What relationship inherits?

do-nae va ve ka?

Which basin propagates?

=====

11. NEGATION

=====

Primary negation:

-nai

rin-nai

does not persist

tal-nai

does not stabilize

kor-nai

failed collapse

en-nai

absent identity

sera-nai

broken continuity

=====

12. POSSESSION

=====

Genesis treats possession as inclusion.

English:

Kira's wagon

Genesis:

Kira-sha wagon

Meaning:

wagon within Kira's boundary

English:

Nyx is Kira's companion

Genesis:

Nyx va Kira-sha rel-rin

=====

13. LOCATION

=====

Location uses boundaries.

wagon va tree-sha rel-rin

The wagon is beside the tree.

sword va wagon-sha da

The sword occupies the wagon.

Kira va village-sha da

Kira is in the village.

=====

14. COMPOUND WORDS

=====

Genesis compounds are structural.

gen + vel

Genesis Field

kai + sha

Configuration Boundary

Binding Circle

kor + en

Collapse Identity

ELDRIS

gen + vara

Genesis Storm

kai + ar + en + rin

Bound Companion

=====

15. COMPRESSION RULES

=====

Architect Speech:

Kai Tor En

Compressed:

Kaien

Architect Speech:

Gen Kor En

Compressed:

Genken

Architect Speech:

Rin Tal Ael

Compressed:

Rintel

Compression follows:

Repeated sounds merge.
Middle particles disappear.
Identity roots dominate.

=====

16. BASIN INFLECTION

=====

Basins influence meaning.

Cipher:

142857
285714
428571
571428
714285
857142

Spoken roots:

ra
Red

o
Orange

ya
Yellow

gi
Green

bu
Blue

vi
Violet

nae-ra

Red Basin

nae-gi

Green Basin

wagon nae-ra

Red wagon

=====

17. REGISTER

=====

COMMON GENESIS

Used by villagers.

Simple.

SCHOLAR GENESIS

Used by researchers.

Expanded.

ARCHITECT GENESIS

Uses Rosetta concepts directly.

POETIC GENESIS

Mythic form.

Used in songs and inscriptions.

=====

18. WRITING RULES

=====

ARCHITECT SIGNS

Equivalent to Kanji.

Structural concepts.

FLOW SCRIPT

Equivalent to Hiragana.

Grammar.

Particles.

BORROWED SCRIPT

Equivalent to Katakana.

Foreign names.

Modern terms.

19. SAMPLE PARSING

English:

The wagon is red.

Genesis:

wagon va nae-ra

English:

The storm is coming.

Genesis:

gen-vara va ve-ru

English:

Kira has a sword.

Genesis:

sword va Kira-sha da

English:

Nyx is with Kira.

Genesis:

Nyx va Kira-sha rel-rin

English:

The ELDRIS formed.

Genesis:

gen-kor-en ta

English:

The binding failed.

Genesis:

kai-sha va kor-nai

=====

20. GRAMMATICAL LAW

=====

Before identity comes relationship.

Before relationship comes boundary.

Before boundary comes environment.

Therefore Genesis speakers naturally
describe reality through:

Boundaries
Occupancies
Relationships
Identities
Persistence

rather than through objects.

This is the defining feature
of Genesis grammar.
