

=====

GENESIS LANGUAGE RULESET v0.1
SPOKEN + WRITTEN LANGUAGE STRUCTURE
Built from:
- MK43 Ultra Rosetta / Architect Script
- Genesis Field topology
- Japanese-style relational grammar
- This / that / boundary logic

=====

=====

CORE DESIGN RULE

=====

Genesis is NOT English translated word-for-word.

Genesis is a relationship-first language.

English asks:

What is the object?

Genesis asks:

Where is the boundary?
What occupies it?
What relationship persists?
What identity closes?

=====

LANGUAGE LAYERS

=====

1. ARCHITECT SCRIPT

The ancient wall notation.

.· inherit
.. propagate
.° stabilize
..° redistribute
..° .° destabilize
..° close
■ .· ■ normalize

2. ROSETTA MEANING

Modern scholarly interpretation of the wall script.

3. SPOKEN GENESIS

Reconstructed spoken language.

4. COMMON DESCENDANT SPEECH

Ordinary village language descended from Genesis fragments.

=====

WRITING SYSTEM

=====

Genesis uses three written layers, inspired by Japanese.

1. ARCHITECT SIGNS

Used for sacred / structural / mathematical concepts.
Equivalent to kanji.

Examples:

Identity
Boundary
Persistence
Topology
Genesis
Collapse
Basin

2. FLOW SCRIPT

Used for grammar particles, endings, small words.
Equivalent to hiragana.

Examples:

relation markers
tense/aspect markers
question markers
demonstratives

3. BORROWED SCRIPT

Used for foreign names, creature names, modern terms.
Equivalent to katakana.

Examples:

Kira
Nyx
city names
trade names

=====

BASIC WORD ORDER

=====

Genesis follows a Japanese-like structure:

TOPIC / CONTEXT
RELATION
IDENTITY / EVENT
VERB / CLOSURE

Default order:

Context - Relation - Identity - Closure

Closest English approximation:

Subject - Object - Verb

But Genesis is better understood as:

Boundary - Relationship - Resolution

Examples:

English:

The wagon is red.

Genesis logic:

This-boundary wagon red-expression closes.

English:

The storm is coming.

Genesis logic:

Storm-topic basin-instability propagates.

=====

NO SIMPLE "IS"

=====

Genesis does not naturally use "is" the way English does.

English:

The wagon is red.

Genesis:

The wagon expresses red.

The wagon closes in red.

The wagon inherits red-basin expression.

English:

The stool is a stool.

Genesis:

Identity inherits identity.

The thing remains itself.

=====

DEMONSTRATIVE SYSTEM

=====

Genesis inherits Japanese-style this / that / over-there logic,
but converts it into boundary logic.

Root demonstratives:

KA

this / within my boundary / near speaker

SA

that / within your boundary / near listener

A

over there / outside both boundaries

DO

unknown / unresolved / question-boundary

Core pattern:

KA = this near me

SA = that near you

A = that outside us

DO = which / what / unresolved

Examples:

ka-en

this identity

this thing here

sa-en
that identity near you

a-en
that identity over there

do-en?
what identity?
what is that?

=====

DEMONSTRATIVE DERIVATIONS

=====

Thing / identity:

ka-en this thing
sa-en that thing near you
a-en that thing over there
do-en which thing?

Place / boundary:

ka-sha this place / this boundary
sa-sha that place near you
a-sha that place over there
do-sha which place?

Direction / propagation:

ka-ve toward here
sa-ve toward there near you
a-ve toward over there
do-ve toward where?

State / condition:

ka-rin this current persistence
sa-rin that current state near you
a-rin that distant state
do-rin what condition?

=====

CORE PARTICLES

=====

Genesis particles mark relationships, not just grammar.

Topic particle:

wa / va

Meaning:

As for...

Regarding this boundary...

Example:

ka-en va
as for this thing

Identity particle:

en

Meaning:
identity / thingness / self-state

Boundary particle:

sha

Meaning:
boundary / edge / separation / place

Relationship particle:

rel

Meaning:
relationship / adjacency / connection

Persistence particle:

rin

Meaning:
persists / remains / continues

Closure particle:

tor

Meaning:
closes / resolves / completes

Collapse particle:

kor

Meaning:
collapses / realizes / becomes through collapse

Propagation particle:

ve

Meaning:
moves / advances / propagates

Inheritance particle:

ar

Meaning:
inherits / carries forward / receives continuity

Stabilization particle:

tal

Meaning:
stabilizes / holds / locks

Question particle:

ka?

Placed at sentence end.

Example:

do-en va rin ka?
Which thing persists?
What remains?

=====

CORE ROOTS

=====

Environment

nae

Configuration
kai

Storm
vara

Architect
arka

Continuity
sera

Closure
tor

Inheritance
ar

Propagation
ve

Stabilization
tal

Normalization
nor

=====

BASIN SYSTEM

=====

There are six basins.

They are not separate colors.
They are six rotations of one structure.

Cipher:

142857
285714
428571
571428
714285
857142

Basins:

Red = $1/7 = 0.142857...$
Orange = $2/7 = 0.285714...$
Yellow = $3/7 = 0.428571...$
Green = $4/7 = 0.571428...$
Blue = $5/7 = 0.714285...$
Violet = $6/7 = 0.857142...$

Spoken basin roots:

Red = ra
Orange = o
Yellow = ya
Green = gi
Blue = bu
Violet = vi

Basin expression:

nae-ra
red basin

nae-gi
green basin

nae-vi
violet basin

=====

COLOR / BASIN STATEMENTS

=====

Genesis does not say:

The wagon is red.

It says:

The wagon expresses red-basin identity.

Short spoken form:

wagon va nae-ra tor.

Literal:

wagon-topic red-basin closes.

Natural English:

The wagon is red.

More Genesis-native:

ka-en va nae-ra rin.

Literal:

this identity red-basin persists.

Meaning:

This thing remains in red expression.

=====

NOUNS

=====

Nouns are usually identity roots.

A noun may be marked with:

-en identity / thing
-sha place / boundary
-rin persistent form
-ael topology / structure

Example:

wagon-en
wagon as an identity

wagon-sha
wagon-space / wagon boundary

wagon-rin
wagon as persistent object

wagon-ael
wagon structure / wagon topology

In casual speech, the suffix may be dropped.

=====

ADJECTIVES

=====

Genesis does not use adjectives like English.

Instead, qualities are expressions or inherited states.

English:

red wagon

Genesis:

wagon nae-ra

Literal:

wagon red-basin

English:

strong wall

Genesis:

wall tal-rin

Literal:

wall stabilized-persistence

English:

old tree

Genesis:

tree rin-deep

Literal:

tree deep persistence

=====

VERBS

=====

Verbs are process roots.

Core verbs:

ar	inherit
ve	propagate
tal	stabilize
kor	collapse
tor	close
rin	persist
nor	normalize
rel	relate
da	occupy

Verb placement:

Usually near the end of the sentence.

Example:

gen-vel va kor.

Literal:

Genesis-field topic collapse.

English:

The Genesis field collapses.

=====

TENSE / ASPECT

Genesis cares less about past/present/future
and more about stability state.

Aspect markers:

- ta
completed / closed
- ru
ongoing / propagating
- ma
potential / not yet closed
- nai
negation / absence / failure

Examples:

- kor-ta
collapsed / has resolved
- kor-ru
collapsing / currently resolving
- kor-ma
may collapse / unresolved
- kor-nai
did not collapse / failed to resolve

QUESTIONS

Questions use DO roots and final KA.

Examples:

- do-en va rin ka?
Which identity persists?
- do-sha va kor ka?
Which boundary collapsed?
- do-nae va ve ka?
Which basin is propagating?
- do-rel va ar ka?
What relationship inherits?

NEGATION

Negation uses NAI.

Examples:

- rin-nai
does not persist

tal-nai
does not stabilize

kor-nai
does not collapse / fails to resolve

en-nai
no identity / identity absent

=====

POSSESSION

=====

Genesis does not treat possession as ownership first.

It treats possession as boundary inclusion.

English:

Kira's wagon.

Genesis:

Kira-sha wagon.

Literal:

wagon inside Kira's boundary.

English:

Nyx is Kira's companion.

Genesis:

Nyx va Kira-sha rel-rin.

Literal:

Nyx topic Kira-boundary relationship-persistence.

Meaning:

Nyx persists in relation to Kira.

=====

LOCATION

=====

Location uses SHA.

English:

The wagon is beside the tree.

Genesis:

wagon va tree-sha rel-rin.

Literal:

wagon topic tree-boundary relationship-persists.

Meaning:

The wagon is beside the tree.

English:

The sword is in the wagon.

Genesis:

 sword va wagon-sha da.

Literal:

 sword topic wagon-boundary occupies.

Meaning:

 The sword is inside the wagon.

=====

BINDING CIRCLE GRAMMAR

=====

Binding circle:

 kai-sha

Configuration boundary:

 kai-sha

Binding event:

 kai-sha va kor-tor-en.

Literal:

 configuration-boundary topic collapse-close-identity.

Meaning:

 The binding circle resolved into identity.

Summon:

 kor-en

Literal:

 collapse identity

Bound companion:

 kai-ar-en-rin

Literal:

 configuration-inherited-identity-persistence

=====

GENESIS STORM GRAMMAR

=====

Genesis Storm:

 gen-vara

Genesis Field:

 gen-vel

Storm approaching:

 gen-vara va ve-ru.

Literal:

Genesis-storm topic propagating.

Storm collapse:

gen-vara va kor-ru.

Literal:

Genesis-storm topic collapsing.

Monster formation:

gen-kor-en ta.

Literal:

Genesis-collapse-identity completed.

Meaning:

An ELDRIS formed.

=====

ELDRIS GRAMMAR

=====

ELDRIS are not "monsters" in Genesis grammar.

They are collapse-identities.

ELDRIS:

gen-kor-en

Literal:

Genesis collapse identity

Red ELDRIS:

gen-kor-en nae-ra

Literal:

Genesis-collapse-identity red-basin

Green ELDRIS:

gen-kor-en nae-gi

Literal:

Genesis-collapse-identity green-basin

A green ELDRIS is coming:

gen-kor-en nae-gi va ve-ru.

Literal:

green Genesis-collapse-identity topic propagating.

Meaning:

A green ELDRIS is coming.

=====

COMMON SAYINGS

=====

1.

Genesis:

En ar en.

Literal:

Identity inherits identity.

Meaning:

Remain yourself.

Use:

Said as comfort, warning, or oath.

2.

Genesis:

Rin tal ael.

Literal:

Persistence stabilizes topology.

Meaning:

Endurance creates structure.

Use:

Said by builders, soldiers, teachers.

3.

Genesis:

Gen kor en.

Literal:

Genesis collapses into identity.

Meaning:

All things become themselves.

Use:

Religious / philosophical saying.

4.

Genesis:

Sha da rel.

Literal:

Boundary occupancy relationship.

Meaning:

Connection begins at separation.

Use:

Architect saying.

5.

Genesis:

Vel ve tor.

Literal:

Field propagates closure.

Meaning:

Every motion seeks resolution.

Use:

Scholar saying.

=====

THE WAGON IS RED

=====

Casual Genesis:

wagon va nae-ra.

Literal:

wagon topic red-basin.

Meaning:

The wagon is red.

Formal Genesis:

wagon-en va nae-ra rin.

Literal:

wagon-identity topic red-basin persists.

Meaning:

The wagon has red expression.

Architect Genesis:

ka-en va nae-ra tor.

Literal:

this identity topic red-basin closes.

Meaning:

This thing resolves as red.

=====

THE STOOL IS A STOOL

=====

Casual Genesis:

stool va stool-rin.

Literal:

stool topic stool-persistence.

Meaning:

The stool remains a stool.

Formal Genesis:

stool-en va ar-en-rin.

Literal:

stool-identity topic inherited-identity-persistence.

Meaning:

The stool remains itself.

Architect Genesis:

En ar en.

Literal:

identity inherits identity.

Meaning:

The thing is itself.

=====

STYLE RULES

=====

1. Do not translate English word-for-word.
2. Always ask:
 - What is the boundary?
 - What is the relationship?
 - What identity persists?
3. Use "is" only in English translation.
Genesis prefers:
 - persists
 - closes
 - inherits
 - stabilizes
 - occupies
 - expresses
4. Color is basin expression.
5. Ownership is boundary inclusion.
6. Location is boundary relationship.
7. Monsters are collapse-identities.
8. Summons are configuration-collapse-identities.
9. Genesis Storms are field-collapse events.
10. Spoken Genesis should feel simple on the surface
but structurally deep underneath.
