GENESIS LANGUAGE / ROSETTA STONE v0.1

MK147 + MK43 ULTRA FOUNDATION DOCUMENT

=====

STATUS:

This is NOT the original Architect language.

The original language is lost.

What survives are:

1. The Walls
2. The Symbols
3. The Relationships
4. The Rosetta Interpretations

Modern Genesis is a reconstructed scholarly language
derived from surviving architectural inscriptions.

Think:

Latin
Ancient Egyptian
Sanskrit
Rosetta Stone

combined into one recovered language.

=====

CORE PHILOSOPHY

=====

English asks:

"What is the thing?"

Genesis asks:

"How is the thing related?"

English is object-centric.

Genesis is relationship-centric.

English:

The mountain exists.

Genesis:

The mountain persists.

English:

The stool is a stool.

Genesis:

The stool inherits itself.

English:

The storm is coming.

Genesis:

Basin instability propagates
toward identity realization.

=====

THE WALLS

=====

The Walls predate recorded history.

Nobody knows who built them.

Nobody knows who carved them.

Nobody knows what civilization spoke the original tongue.

The spoken language is extinct.

Only the symbols remain.

The symbols are believed to describe:

Genesis
Identity
Persistence
Topology
Boundaries
Collapse

The modern Genesis language is a reconstruction.

These are NOT words.

These are operations.

The Walls primarily preserve operations.

These are the foundational nouns.

Everything in MK43 Ultra inherits from these.

GENESIS BASINS

=====

The six basins are NOT six independent states.

They are six rotational states
of a single underlying structure.

FOUNDATIONAL ARCHITECT BELIEFS

=====

Identity inherits persistence.

Persistence stabilizes topology.

Topology permits occupancy.

Relationship permits identity.

Genesis closes into identity.

Collapse is not destruction.

Collapse is realization.

=====

BASIC SENTENCE STRUCTURE

=====

Genesis naturally favors:

CANONICAL SUMMARY

=====

The Walls preserve symbols.

The Symbols preserve relationships.

The Relationships preserve meaning.

Modern Genesis reconstructs speech.

Architects study Genesis.

Scholars teach Genesis.

Most people know fragments of Genesis.

Very few understand Rosetta.

The deeper one studies Genesis,
the less reality appears to be made
of objects and the more it appears
to be made of:

Boundaries
Relationships
Identity
Persistence
Topology
Genesis
